Description

Manufactured in Taiwan

TB-60 is an accurate and powerful electric bending machine able to bend large diameter pipes & tubes in medium to thin wall with optimum and constant bending radii. This compact & versatile pipe & tube bender incorporates a digital control key pad to accurately bend to your requirements.

This compact & versatile pipe and tube bending unit represents great value for a minimal investment

HAFCO METALMASTER TB-60 Electric Pipe & Tube Bender

Features

- Cast iron body tube bender
- 1.1kW 240V motor
- User friendly digital control panel with microprocessor, allowing users to set the required bending angles.
- Capable of storing 50 programs with 9 bends per program
- Electric brake and automatic return to stop
- Designed to bend tube and pipe with constant bending radius without deformation
- Each pipe former consists of a die former and a follow rollers to suit each size
- 210° maximum bending angle

Includes

- Pipe Formers:
 - 1/2" NB - 59.2mm radius
 - 3/4" NB - 80mm radius
 - 1" NB - 100.1mm radius
 - 1-1/4" NB - 127.4mm radius
