6 x Sets of Rolls Included

Description

The SJ-24D bead roller is an inexpensive alternative and perfect solution to having your panels beaded in your home workshop or garage. Made from heavy plate steel and a huge 470mm throat depth making it perfect for strengthening any type of car panel for the roof, seals & guards etc. This bead roller is manually gear driven by a hand crank that drives both the bottom and top bead rolls.

The SJ-24D also includes a stand to accept the six sets of the most common rolls required by metal forming enthusiasts. The drive shafts are supported in quality bearing bushes and incorporate greasing nipples for extra protection.

Features

- 1.2mm mild steel capacity
- 25mm drive shafts
- Ø52mm bead rollers
- Heavy duty steel construction
- Gear driven system
